Author use

```css
sp-tabs::part(tablist) {
    overflow: auto visible;
}
```

Compact   Disabled   Icons   Quiet   Quiet + Compact

Unsolicited advice

Do **not** use any [global attribute names](#) as observed attributes **unless** you are going to use them as defined in the spec.

Some global HTML attributes have browser styles attached which can cause unintended effects.

i.e., using hidden to mean something other than "hide this component from the DOM"
